Products PU Leather Paper Box

PU leather paper is a synthetic material made to look and feel like real leather. It is commonly used as a substitute for genuine leather in various products due to its affordability and durability. PU leather paper is created by coating a paper or fabric substrate with a layer of polyurethane, which gives it a smooth and glossy surface.

Products Special craftsmanship Photoetching

Creating amazing 3D optical effects in flat paper is an art form known as photoetching. Photoetching is a powerful tool for creating stunning and unique 3D optical effects in flat paper. By using this technique, you can create designs that are truly one-of-a-kind, with a level of depth and dimensionality that is sure to capture the attention of anyone who sees them.
